# K&M FLASH HOLE UNIFORMERS

## Instructions for Use

- NEVER use these tools in a case with a "live Primer".
- Insert the K & M Uniformer through the mouth of the case into the flash hole.
- Grip case with the base in the palm of hand while holding the centering cone with thumb and forefinger.
- Apply light pressure to lock the cone into the case mouth.
- Gently turn the tool by hand until the tool comes in contact with the inside bottom of the case.
- Each case will feel different as you cut away the burrs and provide the 60 degree chamfer.
- 50 BMG and Peewee .17, .20 Uniformers operate using a match fit shaft in place of the centering cone.

Patented

Available in many  
styles. See website for  
details and calibers.
