

K&M TAPERED CASE MOUTH REAMER

Instructions for Use

- For best results, resize brass before using this tool.
- Loosen thumb screw; slide cutter in or out to the desired location; securely lock screw.
- Chamfer should be approximately 1/32' (.031").
- Cutter is sharp and will remove material until case mouth hits depth stop.
- Go gently; don't remove too much.
- Bullet will now seat smoothly with its base unharmed.

See website for details.
