

# **K&M PRIMER POCKET CORRECTION TOOL AND HANDLE**

## Instructions for Use

- Do not attempt to adjust setting unless you possess the tools to make precision measurements.
- Tool can be used with handle for manual operation or with a cordless screw driver. Do not use in a high speed drill.
- Place carbide cutter in primer pocket and rotate clockwise until hex body face is in full contact with shell base. For new brass you may need to back cutter out of primer pocket several times to remove brass chips.
- Also an excellent tool for cleaning primer pocket of fired brass.

## Sizes available:

- Large rifle set to .131" depth.
- Small Rifle / Pistol set to .122" depth.
- Large Pistol set to .122" depth.
- Caliber 50 BMG set to .220" depth.
