

## K&M FLASH HOLE UNIFORMERS

### Instructions for Use

- NEVER use these tools in a case with a “live Primer”.
- Insert the K & M Uniformer through the mouth of the case into the flash hole.
- Grip the case with the base in the palm while holding the centering cone with thumb and forefinger.
- Apply light pressure to lock the cone into the case mouth.
- Gently turn the tool by hand until the tool comes in contact with the case web. The cutting depth is set and registered from the case web so once the tool “bottoms” the cutting action is done.
- 50 BMG, .17, and .20 cal Uniformers operate using a match fit shaft in place of the centering cone.
